

HOW MY BOOKS CAN BE USED IN YOUR SCHOOL!

www.leisastewartsharpe.com/fun-stuff

Read the book, then watch the show, in my companion books to the BBC's **Blue Planet II and **The Green Planet!****

Storytime & geography: See Sally Lightfoot make her daily dash across the rockpools in Blue Planet II (Coasts). I've recorded a retelling of that story on my website.

Art: Make an origami Sally Lightfoot crab using the instructions on my website! Or what about a toilet roll shark?

Storytime & geography: See the Tobacco Plant fend off those hungry caterpillars in The Green Planet's (Deserts episode).

Stay tuned for Frozen Planet II coming in Autumn 2022 at the same time as the new show!

Explore our planet and learn what's happening to it in **What a Wonderful World.**

Geography: Discover each of Earth's breathtaking biomes and the wildlife that calls them home!

Geography and science: Learn about how the planet is changing and why. From climate change and extreme weather, to pollution and desertification, I've made the science SIMPLE!

Assembly: Give your pupils hope by sharing 35 real-life stories of Earth Shakers standing up for nature - from children to adults!

Assembly & eco club: Share 30+ tips of how we can all do small things to make a big difference and download the poster so you can tick off your progress!

Art: Read how Erich Hoyt helped to save orcas and then turn a plastic bottle into an orca too!

Geography / Science: Read about how Peter Pratje has spent 30 years in the jungles of Sumatra saving orphaned orangutans, then transform your classroom into Jungle School and learn how the orangutans return to a life in the wild.

Go on a sensory adventure around the planet in **HOW DOES CHOCOLATE TASTE ON EVEREST!**

Geography: This is geography by stealth as you explore some of the world's most extreme / iconic locations in various biomes: from the Mariana Trench and Uluru to Antarctica and Everest.

Facts about the history of exploration are woven into the text too.

Geography and science: Create your own sensory experience of one of these locations, just as I did for Everest!
